Are any of your Production RACF databases split into multiple datasets?

Responses	Count	Percent %
Yes	6	17.1%
No	29	82.9%
Responses	**35**	**100.0%**
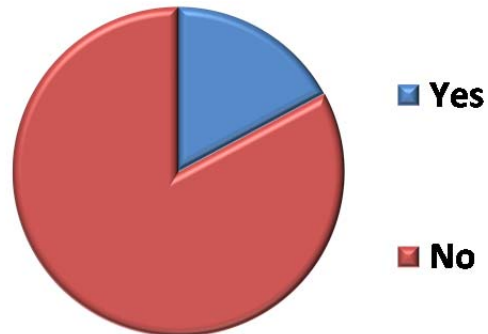

What was the primary rationale for splitting your Production RACF database(s).

Responses	Count	Percent %
The RACF database was very large and at risk of reaching the maximum dataset size limit.	0	0%
Improve performance.	4	66.7%
Do not know. The split was implemented by my predecessor, and the rationale was not documented.	2	33.3%
Responses	**6**	**100.0%**
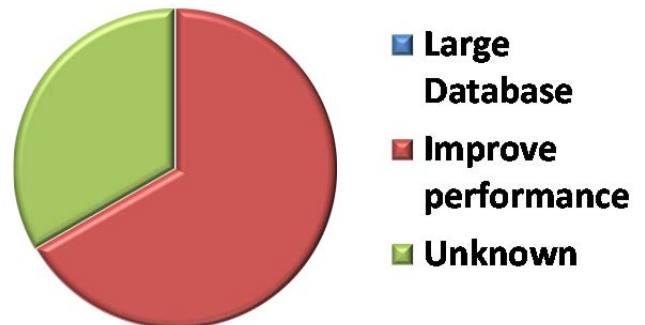

Responses on number of datasets and ICHRRNG entries.

Questions & Responses:	#1	#2	#3	#4	#5	#6	Average
What is the largest number of datasets comprising any one of your split Production RACF databases? (Only provide the count for the Primary database.)	2	3	3	4	5	5	3.6
What is the largest number of entries in the ICHRRNG range table for any one of your split Production RACF databases?	3	3	3	31	43	150	38.8
